MEMORANDUM FOR: Deputy Director for Science and Technology
 Deputy Director for National Foreign Assessment
 Deputy Director for Operations

FROM : Don I. Wortman
 Deputy Director for Administration

SUBJECT : Communications Network Design Project 25X

1. The Office of Communications (OC) has started a project which will ultimately lead to the replacement of its present data and message relay systems. The scope of this project includes all overseas narrative and data services, but does not include the metropolitan Washington interactive data communications support, secure voice or wideband services. The vital first step is to define the user needs upon which the system requirements and network architecture will be based. A user coordination group is being established to serve as a focal point for identifying user needs and to develop a requirements document. We believe that the membership of the user coordination group should include representation from the planning staffs of the DDA, DDO, DDS&T and NFAC. The members should, in turn, elicit requirements from components within their organizations. The group will be chaired by OC and include representatives from the Office of Data Processing and other elements as appropriate.

 25X

2. It is requested that representatives be designated to the user coordination group. For further information on this request, please have your staff contact the OC program manager for this project, 25X
